1.1 SO WHAT MAKES A REPTILE A REPTILE?

The two biggest clues are:

- 1) they are cold-blooded, and
- 2) they are covered in scales.

A turtle finds some
shade to cool down.

Photo Source: Corel Web Gallery

Being cold-blooded means that their bodies react to the temperature of their surroundings. When they get too warm, they can go into the water or shade to cool off.

A lizard catches some sun to warm up.

Photo Source: Corel Web Gallery

When they get too cold they can hang out in the sun to warm themselves up.
